B1-M · Mechanism and sensitivity controls

All five predeclared macro comparisons · saved 99% family intervals

Four inspected DEV collections · two encoder pairs · 25/50/75% budgets · five seeds averaged first

Equal weighting of 24 conditions. Approximate 95% coverage for the five-contrast family.

ARC2 remains λ=10 / two steps. λ=1 is unresolved; no post-score selection or independent ablation claim.
